

DB-01D

Diode Base

Description

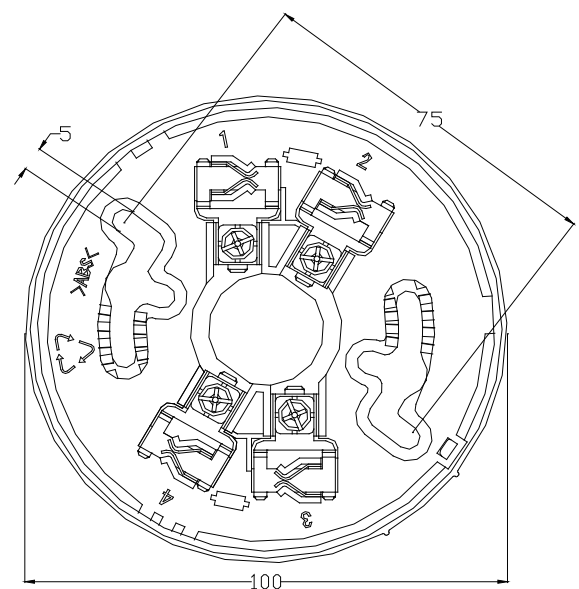

A common base for GST conventional DC series detectors, provides mechanical fixing and electrical connection. There is no electrical component on the base. Together with Active End of Line unit, the diode base can build a non-breaking line of a conventional zone, so that even a detector is removed from the base, the following devices can still work.

The DB-01D base has 4 terminals marked with 1-4. For the detail connections, please refer to the manual of installed detector.

Technical Specification

- Compatible Devices:
DC-9101E, DC-9102E, DC-9103E, DP-9907
- Material: ABS
- Dimension: 103mm(D) X 14mm(H)

Installation Details

Order Information

Part No.	DB-01D
Device Name	Diode Base
Product No.	20101432
