

## 830/850 Series Detectors - End of Life

Following the announcement of the launch of the new 835 and 855 series detectors in marketing bulletin ref MS6337, Johnson Controls hereby announce that the following products from the Fire Detection range have been made obsolete on October 1st, 2022 and will become end of life once stock is exhausted. Once end of life, new stock returns will no longer be accepted for a credit.

The following products have been declared as OBSOLESCE (OBSC) on October 1<sup>st</sup> 2022:

OBSC SKU	Existing Description	New SKU	New Description
516.830.051	830PH Photo Heat Detector	<b>516.835.051</b>	835PH Photo Heat Detector
516.830.052	830P Photo Detector	<b>516.835.052</b>	835P Photo Detector
516.830.053	830H Heat Detector	<b>516.835.053</b>	835H Heat Detector
516.830.054	830PC 3oTec Triple Detector	<b>516.835.054</b>	835PC 3oTec Triple Detector
516.850.051	850PH Photo Heat Detector + Isolator	<b>516.855.051</b>	855PH Photo Heat Detector + Isolator
516.850.052	850P Photo Detector + Isolator	<b>516.855.052</b>	855P Photo Detector + Isolator
516.850.053*	850H Heat Detector + Isolator	<b>516.855.053</b>	855H Heat Detector + Isolator
516.850.053.PM*	850H Heat Detector+ Isolator (Pre - Programmed)	n/a	No replacement
516.850.054*	850PC 3oTec Triple Detector + Isolator	<b>516.855.054</b>	855PC 3oTec Triple Detector + Isolator
516.850.054.PM*	850PC 3oTec Triple Detector + Isolator (Pre-Programmed)	n/a	No replacement

\* Available only for the Marine business

### Obsolescence Exceptions

For Switzerland and Belgium where cross-listing are pending.

\* Marked SKU's will be exclusive available for Global Marine business and 850H for France.

### Backward Compatibility

If an 830 or 850 series detector is replaced by its 835 or 855 series equivalent, the panel firmware will recognise the device as an 830 or 850 series device. When programming a new system, the equivalent 830 or 850 series detector should be selected. Future releases of MX Consys will incorporate the new device descriptions.

The existing 830 and 850 series detectors are not produced with a QR code and so cannot be used with the new Digital Enrollment mobile application. To take advantage of this exciting new way of addressing Zettler fire alarm systems, the new 835 and 855 series detectors must be used.

If you have any queries regarding these products in the Fire Detection product range, please contact your Sales Representative.
